

Erasmus + diary

Greece

1st April

We landed in Greece at 17:15 and we went to the Stanley hotel. When we settled down we went to eat at a restaurant. We walked around the city Athens.

2nd April

In the morning we met with the other schools who were going to participate in Erasmus +. We went to the Acropolis, there we had a guided tour of the Acropolis. We had the chance to go and see a panoramic view of Athens. It was breath taking! After the tour we visited the acropolis museum. There we saw Caryatids. These were sculpted female figures. After the museum we had 3 hours on the bus to arrive at Patras. When we arrived the teachers greeted us with traditional dances. After that the

teachers prepared a barbeque. There was a lot of traditional food like kebabs, pita bread and greek yoghurt. After the ceremony everyone went to the hotel.

3rd April

It was the first day of school. We were placed in different groups. We had an assignment to build a robot in 2 days. I didn't know nothing about robots. That day we built the robot. After school it started raining so we couldn't visit the places we were going to. We found a café and stayed there for 2 hours. A teacher booked a taxi so we could go to a famous pizzeria called Signore there we had our dinner. We went to visit the city centre.

4th April

We visited the Rio–Antirrio bridge. This bridge was built for the Olympic Games in 2004. After that we went on a construction site of a high

way. As usual we went to school and completed our robot. When school finished we went to the beach. There was an amazing view of the sea and mountains. We had a lot of pictures. We ate there too and saw the amazing sunset.

5th April

We visited the International Olympic Academy. There we saw some of the children singing the Olympic anthem. We saw the Olympic museum of the Olympic games 2004. We visited the Unesco world heritage site, Olympia. After we went to eat dinner at a restaurant. When we were ordering the food there was an earthquake. It was 4.6.

6th April

It was the last day for us to be as whole group of the program. We went to a science centre. There we were split into groups and each group had to discuss and experiment. After that we

presented our robots in a hall. Our robot worked fine. In the evening we went to a restaurant where we had to say our last goodbye.

7th April

A mini bus came to pick us up from the hotel. We went on a train ride in the mountains. Then we went and visited the caves. I saw three bats flying above our heads. We visited some monastery's in the mountains.

8th April

We had to wake up really early because we were going home. The same mini bus came to pick us up from the hotel we had four hours to arrive at the airport but we stopped at a place. At four we landed at Malta.

It was a vacation to remember!
